DATA ANALYST | SQL | POWER BI | BUSINESS INSIGHTS

Results-driven Data Analyst with 10+ years of IT experience including 6+ years in SQL development and data analysis. Strong expertise in analyzing large datasets, building dashboards, and generating actionable business insights. Proven ability to translate complex data into meaningful reports to support decision-making. Experience working with healthcare and transactional datasets.

CORE SKILLS

Data Analysis & BI: SQL (MySQL, SQL Server), Power BI (Dashboarding, DAX, Data Modeling), Excel (Pivot Tables, Lookup Functions)
Data Handling: Data Cleaning, Data Validation, Data Transformation, ETL (SSIS)
Techniques: Data Analysis, Trend Analysis, Customer Segmentation, Business Reporting
Tools: Python (Pandas – Basic), Power BI, Excel, SSMS, Git

PROFESSIONAL EXPERIENCE

Inventurus Knowledge Solutions Pvt. Ltd. (Aug 2019 – Present)
Senior Database Developer / Data Analyst

- Analyzed large-scale healthcare datasets using SQL to generate actionable business insights
- Developed complex queries (joins, CTEs, window functions) for reporting and data analysis
- Created reports to track patient trends, claims data, and operational performance
- Improved report performance by 30% through SQL query optimization
- Performed data validation and ensured high data quality for business reporting
- Collaborated with stakeholders to understand reporting needs and deliver data-driven solutions
- Supported decision-making by providing accurate and timely analytical reports

Evia Information Systems Pvt. Ltd. (May 2018 – Aug 2019)
Database Developer

- Designed and maintained SQL databases for business applications
- Built ETL workflows using SSIS for data processing and reporting
- Developed SQL queries and procedures to support reporting requirements
- Performed performance tuning, indexing, and database optimization

Previous Experience (2014 – 2018)
Database Support Engineer
- Provided L1/L2 support for SQL Server and MySQL databases
- Monitored database performance and resolved production issues
- Ensured system availability and data integrity

PROJECTS (ANALYSIS FOCUSED)

Customer Churn Analysis :

• Analyzed customer data to identify key factors contributing to churn

• Identified high-risk customer segments based on tenure, contract type, and usage patterns.

• Created dashboards to visualize churn trends and customer behavior.

• Enabled business teams to take proactive retention actions.

Fraud Transaction Analysis:

• Analyzed transaction data to detect unusual patterns and anomalies.

• Identified high-risk transactions based on frequency and transaction value.

• Built logic to flag potentially fraudulent activities.

• Provided insights to improve fraud detection strategies.

Customer Segmentation:

• Performed customer segmentation using data analysis techniques

• Identified different customer groups for targeted marketing strategies.

Time Series Sales/Trend Analysis:

• Analyzed time-based data to identify trends and seasonal patterns.

• Generated insights to support forecasting and planning decisions.

Education

Master of Science in Data Science – Pursuing (3rd Semester)

- University: [Symbiosis University]
- GPA: 1st Sem – 7.57, 2nd Sem – 7.54

Bachelor of Science (Information Technology) – Mumbai University

Certifications

- Diploma in Software Testing (DST) – SEED Infotech (2012)

KEY HIGHLIGHTS

- 6+ years of strong SQL experience for data analysis
- Hands-on experience with real-world datasets and reporting
- Strong ability to convert data into business insights
- Experience in dashboard creation and stakeholder communication
